SUMMARY

I have a solid foundation in software development specifically in the website development field with valuable experience spanning over a year and a half. During this time, I've had the opportunity to work on different kinds of projects and develop new tech skills. I'm confident in my abilities and eager to continue growing and learning in my professional journey.

PROJECTS I HAVE BEEN INVOLVED

Learning Platform

2023 – present

Tech Stack

PHP, Laravel, Inertia, Vuejs, Mysql, Tailwindcss

- Actively participated in code reviews, providing constructive feedback to maintain code quality and consistency.
- Collaborated with cross-functional teams, including designers to ensure seamless integration of new features.
- Actively monitored user feedback and conducted user testing to gather insights for further improvements.
- Improved application performance by optimizing queries, leading to faster load times and a smoother user experience.
- Resolved critical bugs and issues, significantly enhancing the stability and reliability of the web app.
- Familiarity with version control systems, such as Git, for collaborative development and code management.
- Experience working with Laravel and Vuejs for front-end and back-end development.

Novel System

2023 – 03/2023

Tech Stack

PHP, Laravel, Vuejs, Mysql, Tailwindcss

- Assumed a critical role in the development and optimization of a novel system, ensuring high performance and efficiency.
- Improved application performance by optimizing queries, leading to faster load times and a smoother user experience
- Collaborated with the development team to implement performance optimizations, including algorithmic enhancements, caching strategies, and data structure optimizations.

Logistics Software

07/2023 – 10/2023

Tech Stack

PHP, Laravel, Inertia, Tailwindcss, React, ReactNative

- Created a user-friendly interface that allows users to easily manage their logistics operations
- I was responsible for developing the dashboard, which serves as the central hub for logistics management. It provides order management and reporting functionalities.
- Developed and integrated real-time notifications, enabling users to receive immediate updates on orders and logistics events, thus enhancing communication and responsiveness.
- Ensured that the dashboard's design was responsive, adapting to various screen sizes and devices, which improved accessibility and user satisfaction.
- Leveraged data visualization tools and libraries to provide users with insightful reports and analytics for informed decision-making.

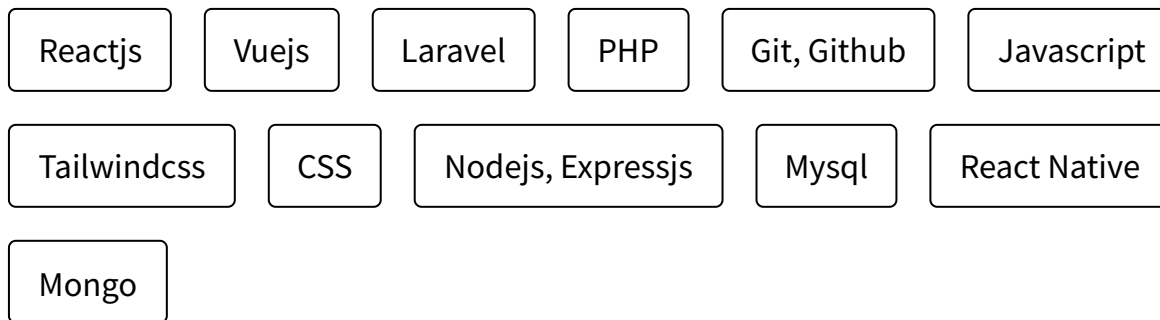

Ads Watching Application

Tech Stack

PHP, Laravel, Bootstrap, Mysql,

- Led the development of an ads watching platform that rewards users with points for watching ads, allowing them to make money withdrawals based on their accumulated points. Utilized Laravel API for backend development and Bootstrap for the dashboard interface.
- Developed a point accumulation system, ensuring accurate calculation and tracking of points earned by users for watching ads.
- Designed and developed the backend API using Laravel, enabling secure user authentication, ad management, and point accumulation tracking.

SKILLS

OPEN SOURCE PROJECTS

E-commerce Web App [↗](#)

Tech Stack

PHP, Laravel, Vuejs, Tailwindcss, Mysql

- Completed a self-directed web development practice project to enhance technical skills and gain hands-on experience in web development.
- Developed a small-scale web application using HTML, CSS, and vuejs to create a responsive and interactive user interface.
- Practiced version control using Git, maintaining a repository to track changes and collaborate effectively during development.

INTERESTS

Reading Cartoon

Passionate about cartoons, and using this interest to expand my knowledge of history.

Coding

I am really in love with coding as programs can be automated to do boring stuff. Of course, humans don't want to do something the same over again and again
